Recommended Lenovo Computers

Summer 2023 - www.saintmarys.edu/resnet

To order a recommended Lenovo computer online through Saint Mary's College:

ResNet recommends that you take the time to review our *2023/2024 Student's Guide for Bringing a Computer to Saint Mary's College*, available on our ResNet website at www.saintmarys.edu/resnet, before selecting a computer for purchase.

-  Visit www.lenovo.com/saintmarys to access our custom Saint Mary's College Lenovo website with special pricing for Saint Mary's students.
-  Get your computer quickly! Model names that include the words "In Stock and Ready to Ship" are in stock and ready to ship in 1-3 business days. These models will also offer a yellow "Accessorize & Buy" button next to them.
-  Model names that include the word "Configurable" can be purchased with upgraded features. Click on the blue "Customize And Buy" button, make any desired adjustments (which may affect the price), then click on the "Add to cart" button. Customized computer models are build to order and shipping times will vary.
-  Warranty configuration options will be available after you've added a computer to your cart.
-  Please note that the Accessories listed at www.lenovo.com/saintmarys are recommended by Lenovo and not specifically by Saint Mary's College.

Why order a recommended Lenovo computer online?

Our recommended models include a supported operating system, have system specifications that should help the computer last for four years at Saint Mary's, and include at least a three-year Lenovo warranty. The ThinkPad T14s (available for purchase as a "Ready to Ship" option and as a "Configurable" option) is the same model Saint Mary's Information Technology is purchasing this summer for College faculty and staff who use Windows computers.

Our recommended Lenovo models offer Windows 11 Home (64-bit) or Windows 11 Pro (64-bit) pre-installed, which are both supported by ResNet and compatible with our campus network.

If you choose to buy a new computer that is not one of our recommended models, ResNet strongly recommends purchasing a computer that already has a supported operating system installed. For more information on our supported operating systems, please visit the ResNet website at www.saintmarys.edu/resnet and refer to our *Student's Guide for Bringing a Computer to Saint Mary's College*.

Computers with unsupported operating systems will be unable to receive technical assistance from ResNet, and may not be able to connect to the BelleNet network in the residence halls, access Saint Mary's e-mail, use features of Google's Workspace for Education, or use software required for courses. Chromebooks are not supported by ResNet, and a Chromebook will not meet a student's academic needs at Saint Mary's College.
