

# BE A TEACHER.

### **Let's change lives together**

It takes a unique type of person to become a teacher. Someone who wants to inspire young minds and help children not only experience and learn new things, but see the world from new and bigger vantage points. If you're ready to make an impact as a teacher, we're here to help you get a strong start to your career.

Together we will build your practical skills, develop your leadership style, and uncover your passion to shape today's children into tomorrow leaders.

## Work with students in local schools

Are you ready for some real experience? Once you start your core work in education, we'll have you in local schools assisting talented teachers in the classroom. Our field work program has a well-developed structure that will allow you to build your knowledge and experience incrementally as you work side-by-side with department faculty. Through this process, you'll gain valuable experience, build confidence, and establish skills that one day you can put to use in your own classroom.

"The amount of time I've spent in the classroom and the support I've received in local schools has allowed me to get so much out of the experience."

—Megan Doherty '17
