MASTER OF SOCIAL WORK

Equip yourself with the knowledge and skills you need to make a difference with a Master of Social Work degree from Saint Mary's College. You'll learn how to implement proven, effective social work practices founded on compassionate values.

This clinically focused MSW program is asynchronous and taught online with an optional one-weekend campus immersion. The approach gives you flexibility in how you learn, so you can fit your degree around your busy schedule. It is open to both men and women.

You'll still have plenty of hands-on experience thanks to field placements in your own community that you will work with the MSW Program Director of Field Education to locate. Your coursework complements your placement allowing you to put theory into practice.

What is a Clinical Social Worker?

A clinical social worker has a MSW, has passed a base license exam, and has completed their state's requirements for eligibility to take a clinical exam. Upon passing the clinical exam they are able to practice as a clinical social worker, allowing them to work in a variety of settings.

The Master's Degree is the terminal degree in social work, meaning it is the highest degree in the field. It signifies a level of mastery and expertise, preparing you for advance practice, professorship, and other specialized roles.

The MSW at Saint Mary's readies students to take the base licensing exam and eventually gain the clinical credential, which is unique in that it allows social workers to take positions in a wide variety of settings such as schools, healthcare, government, non-profit and more.

OUR COURSES

In addition to studying foundational social work topics, you will specialize in clinical social work to prepare to work in hospitals, mental health clinics and a variety of different client settings—with an optional added emphasis on aging and addictions available to meet the needs of the rapidly growing population of seniors.

You will also focus on these key courses, developed to increase students' knowledge of how to advocate for social, racial, economic, and environmental justice that are taught at the forefront of the MSW curriculum. Here, students gain knowledge of core CSWE competencies related to justice for all populations and apply this knowledge to their continuing MSW curriculum—including their field practicum.

- Justice-Based Social Work Practice (SW 500)
- Diversity, Equity, and Inclusion (SW 600)

These skills will help our graduates succeed in clinical social work anywhere in the world.
